

## Parts' Price file import in FordEcat

### 1.) Import method

The *Load Price File* page enables you to import *part* price lists, which will update the price list installed in FordEcat. For every combination of market and display currency, one *part* price list is allowed. Prices in the imported price lists can apply to all parts catalogued in FordEcat - including **Ford**, Supersession and Dealership parts - and the prices in the list can be continually updated.

#### To upload a price file:

1. If the *Settings* screen is not displayed, click **Settings** from the main toolbar.
2. Click the *ADMINISTRATION* tab.
3. Click **Load Price File**.
4. To upload a price list for parts, select *Part*.  
Or -  
To upload a fixed-price price list for service menus, select *SMILE*.
5. Enter the path to the required file, or click **Browse** to search for and select the file.
6. Click **Load**.

A status message indicates the success or failure of the operation. FordEcat displays the number of part-prices / menu-prices uploaded and the number rejected. If rejected, the reason is stated - either the record is invalid, or the item does not exist in FordEcat.

#### To return to the current FordEcat session from this page:

- In the upper-right part of the page, click **Back to Session**.

## 2.) Import file format

This section details the format of the Price File to import in FordEcat in order to alter the displayed prices. This file must be a tab delimited text file.

You will find a sample of file content in section 4.) of this document.

### Header Record

The header record contains general information about the Price List.

Field No.	Field Name	Definition	Comment	Sample
	Market Code	Market generic code	Must match the codes within FordEcat	<i>For Britain:</i> <b>GB</b>
	Currency Code	Currency ISO codes	Must match the codes within FordEcat	<i>For Britain:</i> <b>GBP</b>

The recognized values for these codes are available in section 3.) of this document.

### Body Record

The body record contains the information of the Price List items.

Field No.	Field Name	Definition	Comment	Sample
1.	Item Number	Valid Part number	Must be supported within the FordEcat system as a Ford Service Part or as Dealership Data item. Otherwise – record is ignored	<b>Service part:</b> <b>6049935</b>  <b>Dealership data:</b> <b>#12345</b>
2.	Price	Retail price excluding tax	Numeric field that supports prices by 2 places after the decimal point or an integer that represents the price as multiplied by 100	<b>123.45</b>  Warning! 123,45 is not valid
3.	Tax Code	Tax generic code	Must be supported within FordEcat – otherwise – record is ignored	<b>A</b>
4.	Surcharge	Surcharge value	Numeric field that supports prices by 2 places after the decimal point or an integer that represents the surcharge as multiplied by 100	<b>20.50</b>  Warning: 20,50 is not valid
5.	Discount Code	Discount Code	Must be supported within FordEcat – otherwise – record is ignored	<b>AA</b>
